Accounting Systems

Sound good so far?

Read on to find out more about the specific features and solutions offered, and how Access Mintsoft helps your specific business needs.

3PLs and fulfilment houses

Are you looking for a solution that lets you manage all of your orders from one simple to use platform? Access Mintsoft makes this possible, meaning order management and warehouse management have never been easier.

“

Calculating Third Party fulfilment costings was previously a nightmare and highly time-consuming. It's now all calculated automatically on a order by order basis.

The Fulfillment Company Ltd

”

Features and benefits:

Get a full overview of your warehouse, inventory and courier relationships from our easy-to-use platform. Take a look at some of the popular features offered and the benefits these provide:

Customisation: Seamless brand management

Access Mintsoft allows you to provide your customers with real-time client access and can be customised to match your customers' brands.

Batch management: Quick, easy and straight-forward picking

You can filter in multiple ways to create batches to suit your workflows. Select and group orders by Zone, Courier, Client, Single Item and more.

Mobile app: Barcode scanning made easy

With the dedicated app for iOS and Android, you're able to sort orders and scan items at the click of a button no matter where you are. You can also look at orders, send invoices and manage courier integrations at your fingertips with the easy-to-use app.

Advanced order rules: Keep on top of orders

Order management is made easy by performing advanced actions as soon as your orders are imported. Through your dashboard, you can perform actions such as hold orders awaiting payment, change courier services, add despatch dates and much more.

Online retailers

E-commerce demand is at an all-time high and something as small as a payment error, missed order, or delivery issue can be enough to lose customer loyalty these days. Luckily, Access Mintsoft makes order management easy for online retailers.

Access Mintsoft currently enhances the operations of more than 500 businesses across the UK and EU

shipments are processed through the Mintsoft platform every month

Features and benefits:

Having an automated order management process in place will reduce errors and help to deliver a more responsive and consistent service. Take a look at some of the popular features offered and the benefits these provide:

Inventory management: No more overselling or unhappy customers

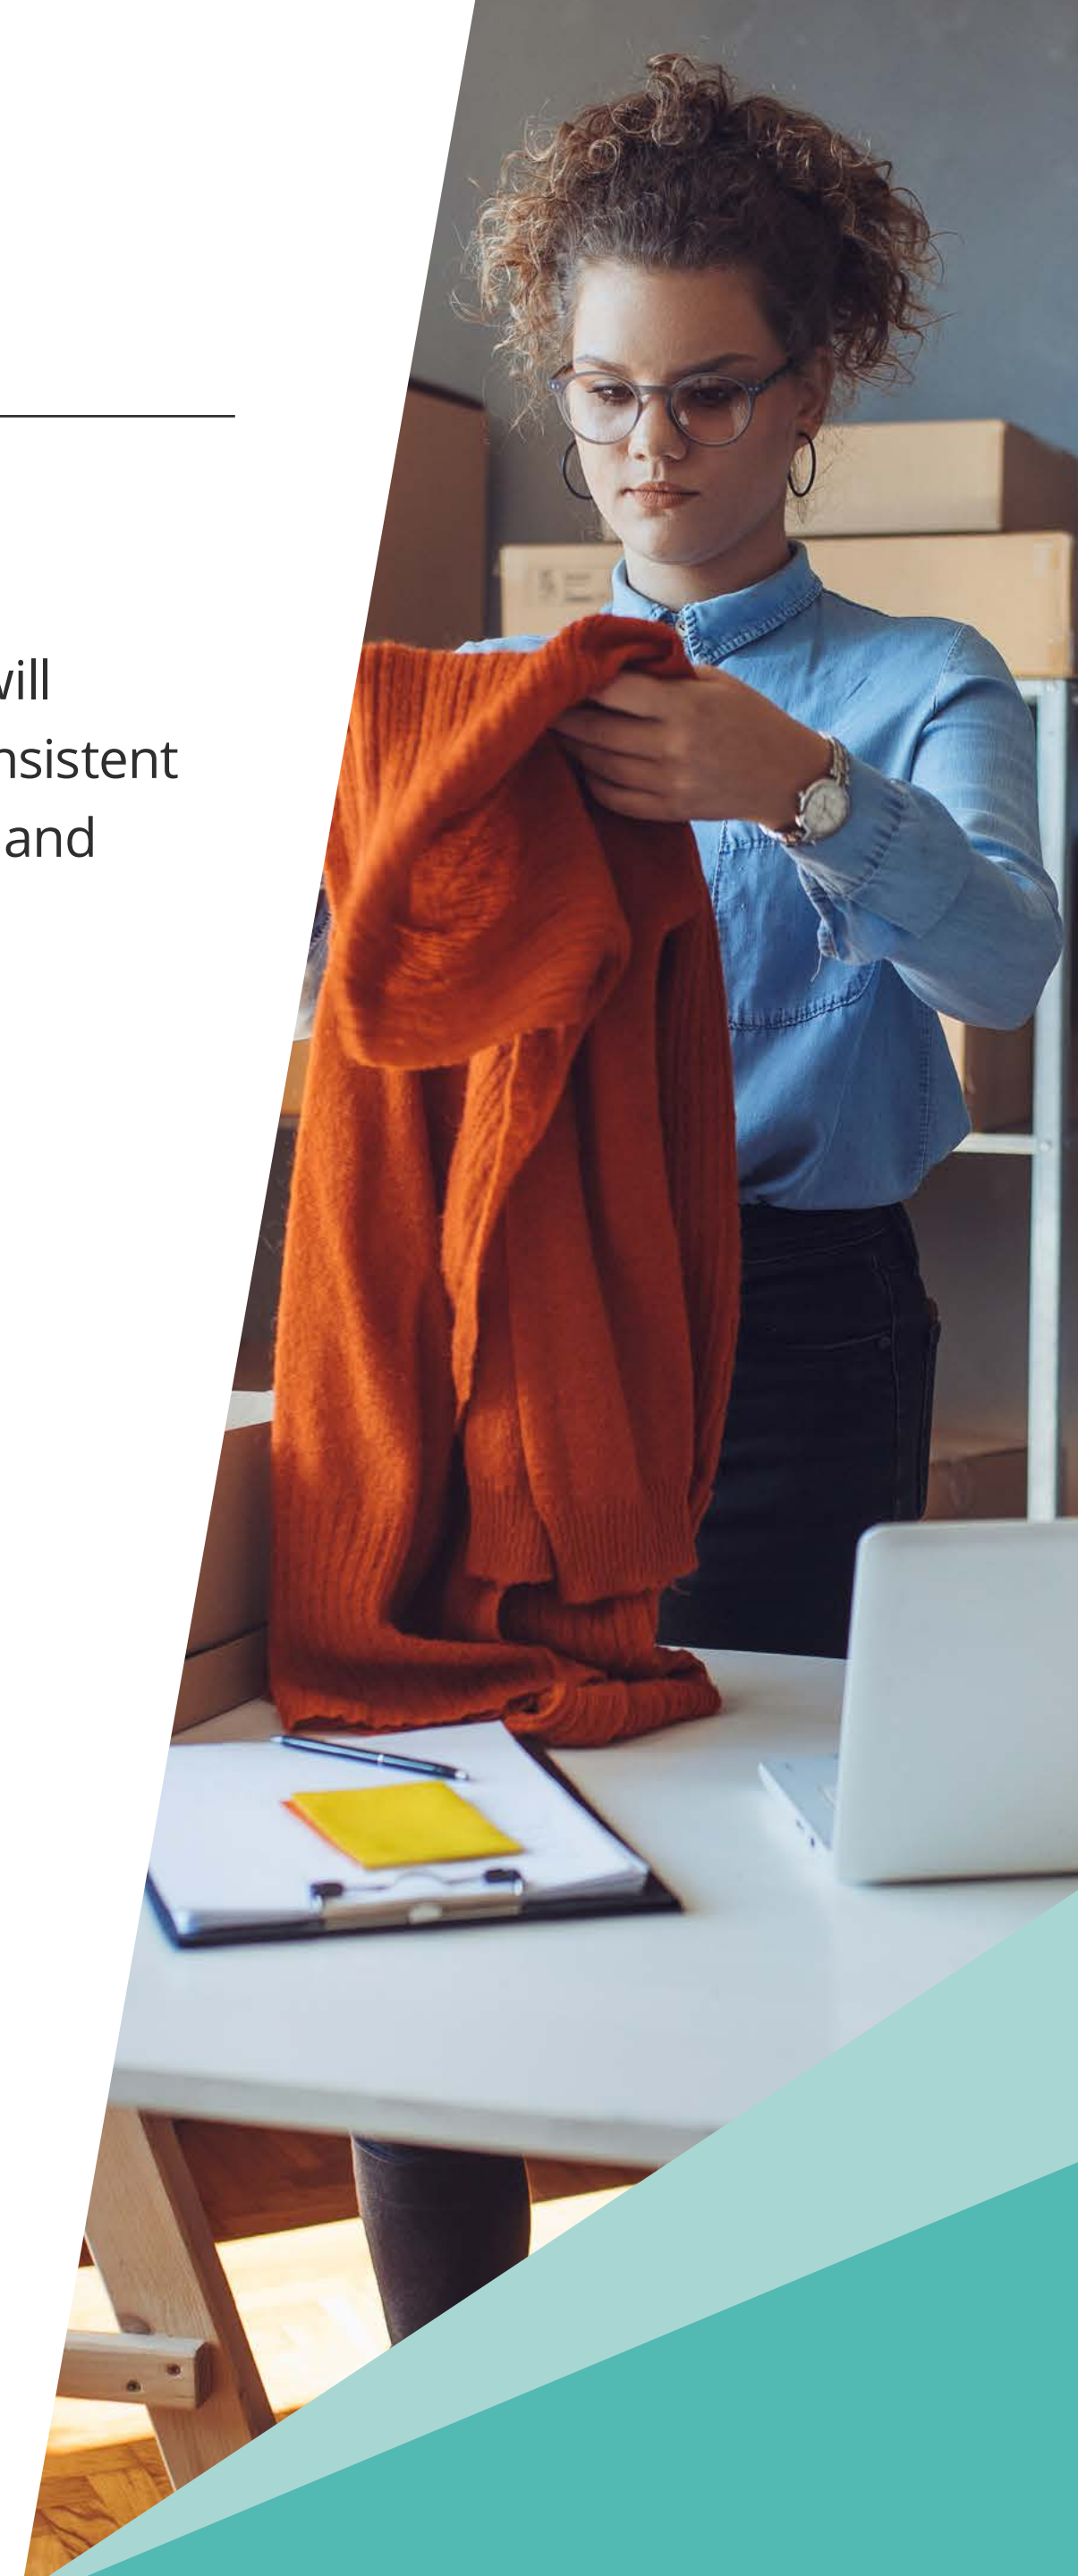

Access Mintsoft automatically syncs your stock levels, allowing each of your sales channels to remain up to date. This not only saves valuable time, but it ultimately improves customer experience.

Dropshipping: Take control of your supply chain

The Access Mintsoft platform lets you set up lists of drop ship products and suppliers to automatically split out products from orders you do not fulfil yourself.

Order management: Increased speed and accuracy of orders

From hundreds of E-Commerce integrations, to shipping management, Access Mintsoft allows you to take control of the full despatch process from picking, packing to shipping of orders.

Integrations

You will have access to over 60 marketplace and 80 courier integrations from day one, as standard. We aim to give you access to as many sales channels and courier services as possible to provide you complete flexibility, and continue to add new integrations with every release of the software.

Access Mintsoft has quite literally revolutionised our business. We onboarded with the 3PL solution in May of 2020 - in the midst of the lockdown and increased order volumes. Our initial account set up and fantastic training was undertaken in it's entirety by Mark - one of the founders and creators. Once we were on and using the software - it's been nothing but excellent. It's very fast, powerful and reliable.

Little Dart Fulfilment

Features and benefits of our integrations:

The 175+ integrations are managed from a single platform, setting you up to establish meaningful supplier and customer relationships.

Multi-channel management:

Connect with a large number of shopping carts and marketplaces from one platform. New integrations are released every 2-4 weeks.

Shipping management:

If your business despatches and ships multiple deliveries via third-party courier service providers, then you have experienced the complications and frustrations of managing this volume of order data.

Our courier integrations mean you can manage all your direct and multi-couriers through one simple to use platform, with smart shipping rules, automated shipping labels and order tracking.

Mintsoft is connected to every major courier service in the UK and automatically selects the cheapest courier option based on delivery requirements. As all of our courier shipments are produced in the same way, it's easy to swap from one courier to another, to suit your delivery needs.

Accounting Systems

Warehousing Systems

Shopping Carts

Marketplaces

Inventory systems

Direct Couriers

Multi couriers

We've put together some FAQs below, but if there's something else you'd like more information about, get in touch today to find out how Access Mintsoft can support your business.

What systems does Mintsoft integrate with - does this cost extra?

Access Mintsoft allows you to seamlessly integrate with over 175 sales channels and courier services at no extra cost. Our aim is to give you access to as many sales channels and courier services as possible to provide you complete flexibility, and are continuously expanding our portfolio of integration partners.

How much does the Mintsoft platform cost for 3PLs and fulfillment houses?

All of our pricing plans can be found [here](#). We have 4 tiers of plans, depending on your business size and needs. We also offer custom pricing packages to suit your volumes if your requirements exceed the features offered by the maximum tier.

Do you offer a free trial?

We don't offer free trials, however our friendly sales team can provide in-depth, personalised demos, to illustrate how Access Mintsoft will work within your business.

How quickly can you get started with Mintsoft?

Set up time varies depending on individual needs, but your personalised platform is usually ready within 24 hours following your kick off meeting with our Customer Success team. Once ready, our dedicated onboarding team will ensure you and your team are comfortable using the platform.

What is the pricing for online retailers?

We have 4 tiers of plans, depending on your business size, and all of our pricing plans for multi-channel retailers can be found [here](#). If your requirements exceed the features offered by the maximum tier, we offer custom pricing packages to suit your business needs as well.

Is Mintsoft UK based only?

No, Mintsoft can provide services to businesses worldwide. Our extensive network of integrations allows us to offer support to 3PLs, warehouses and online retailers anywhere in the world.

What is the uptime of the platform?

Average uptime of the Mintsoft platform is 99.5%.

What support will I receive post sale?

You will have a dedicated account manager for the first 6 months following go-live to make sure everything is running smoothly and you're getting the most from the platform. After this, our Customer Support team will be on hand to help out with any queries.

Webinars, blogs and helpful guides on our website will also keep you up to date with new platform releases, exciting product features and industry trends.

What equipment do you need to get started with Mintsoft?

Mintsoft is a cloud-based system, so there are no physical requirements, but we can integrate with physical kit you have, like your scanners and printers. Getting set up with us is as simple as signing an agreement, and then letting us guide you through the rapid onboarding process.
